

```
import { createNft, initializeApi, getKeyringFromSeed, WaitUntil, safeDisconnect,
NFTCreatedEvent } from "ternoa-js";
```

```
const mintNFT = async (): Promise<NFTCreatedEvent> => {
  try {
    await initializeApi();
    const keyring = await getKeyringFromSeed("//TernoaTestAccount");
    const nftData = await createNft(
      "hello world",
      0,
      undefined,
      false,
      keyring,
      WaitUntil.BlockInclusion
    );
    console.log("The on-chain NFT id is: ", nftData.nftId);
  } catch (e) {
    console.error(e);
  } finally {
    await safeDisconnect();
    process.exit();
  }
};
```
